

Application Serial No.: 09/661,189

Attorney Docket No. 23453-034

In Response to FINAL Office Action mailed February 4, 2004

This listing of claims will replace all prior versions and listings of claims in the Application.

LISTING OF CLAIMS:

1. ***(Previously Presented)*** A system for the delivery of voice messages to a voice service subscriber using voice commands, comprising:

 a call server, the call server initiating an outbound communication to a voice service subscriber to commence a voice service session based on the occurrence of a predetermined event specified by the subscriber during a subscription process;

 an input module, the input module sensing a voice input command from the subscriber during the voice service session; and

 a content delivery module, communicating with the input module, the content delivery module selecting at least one of a plurality of voice messages to deliver to the subscriber according to the voice input command.

2. ***(Original)*** The system of claim 1, wherein the input module comprises an analog to digital converter which converts the voice input command to digital voice data.

3. ***(Previously Presented)*** The system of claim 2, wherein the input module stores the digital voice data.

Application Serial No.: 09/661,189

Attorney Docket No. 23453-034

In Response to FINAL Office Action mailed February 4, 2004

4. ***(Previously Presented)*** The system of claim 2, further comprising a discriminator module, the discriminator module communicating with the input module and the content delivery module and identifying the digital voice data as at least one of a plurality of predetermined commands.
5. ***(Original)*** The system of claim 4, wherein the content delivery module presents the subscriber with voice message content according to the digital voice data.
6. ***(Original)*** The system of claim 5, wherein the content delivery module presents the subscriber with at least one voice command prompt to query voice input from the subscriber.
7. ***(Previously Presented)*** The system of claim 6, wherein the at least one voice command prompt comprises a sequence of voice command prompts.
8. ***(Original)*** The system of claim 7, wherein the sequence of voice command prompts comprises a set of voice command prompts adaptively presented according to the digital voice data.
9. ***(Previously Presented)*** The system of claim 1, wherein the input module authenticates the subscriber for receipt of the at least one of a plurality of voice messages.

Attorney Docket No. 23453-034

In Response to FINAL Office Action mailed February 4, 2004

10. **(Original)** The system of claim 9, wherein the authentication comprises at least one of PIN verification and voice identification.

11. **(Previously Presented)** A method for the delivery of voice messages to a voice service subscriber using voice commands, comprising:

initiating an outbound communication to a voice service subscriber to commence a voice service session based on the occurrence of a predetermined event specified by the subscriber during a subscription process;

sensing a voice input command from the subscriber during the voice service session; and

selecting at least one of a plurality of voice messages to deliver to the subscriber according to the voice input command sensed.

12. **(Previously Presented)** The method of claim 11, wherein the step of sensing comprises a step of converting the voice input command to digital voice data in an analog to digital converter.

13. **(Previously Presented)** The method of claim 12, further comprising a step of storing the digital voice data.

Application Serial No.: 09/661,189

Attorney Docket No. 23453-034

In Response to FINAL Office Action mailed February 4, 2004

14. *(Previously Presented)* The method of claim 13, further comprising a step of discriminating at least one of a plurality of predetermined commands according to the digital voice data.
15. *(Previously Presented)* The method of claim 14, further comprising a step of presenting the subscriber with voice message content according to the digital voice data.
16. *(Previously Presented)* The method of claim 15, further comprising a step of presenting the subscriber with at least one voice command prompt to query voice input from the subscriber.
17. *(Previously Presented)* The method of claim 16, wherein the at least one voice command prompt comprises a sequence of voice command prompts.
18. *(Original)* The method of claim 17, wherein the sequence of voice command prompts comprises a set of voice command prompts adaptively selected according to the digital voice data.
19. *(Previously Presented)* The method of claim 11, further comprising a step of authenticating the subscriber for receipt of the at least one of a plurality of voice messages.
